BITUMINOUS ROADWAYS INC. WINS NATIONAL AWARD FOR QUALITY IN ASPHALT PAVING

Lanham, Md. — The National Asphalt Pavement Association (NAPA) announced today that Bituminous Roadways, Inc. of Mendota Heights, Minn., won a 2016 Quality in Construction Award for excellence in construction of an asphalt pavement. The company received its award today at a ceremony during the association's 62nd Annual Meeting in Orlando.

"Earning a Quality in Construction Award shows a strong commitment to quality from a contractor who measures their project against industry best practices," said 2016 NAPA Chairman Kevin Kelly. "In earning this Quality in Construction Award, Bituminous Roadways has constructed a safe, quiet, smooth asphalt pavement."

Bituminous Roadways won the award for its work on the Hastings High School parking lot in Hastings, Minn. While constructing the project the company discovered unexpected rutting that required additional grading work. Despite this challenge, Bituminous Roadways completed a high-quality parking lot on schedule in just four weeks, gaining local press attention for its high-quality work.

Bituminous Roadways, Inc. has been in business for more than 70 years with a mission to become the preferred pavement partner in the Twin Cities Metro area. Core competencies range from asphalt paving, patching, crack-filling and milling, to excavating and grading. Projects include parking lots, streets and highways, trails, athletic surfaces, and more. The corporate headquarters is located at 1520 Commerce Dr., Mendota Heights, Minn. For more information, visit www.bitroads.com.

###

The National Asphalt Pavement Association (NAPA) is the only trade association that exclusively represents the interests of the asphalt producer/contractor on the national level with Congress, government agencies, and other national trade and business organizations. NAPA supports an active research program designed to improve the quality of asphalt pavements and paving techniques used in the construction of roads, streets, highways, parking lots, airports, and environmental and recreational facilities. The association provides technical, educational, and marketing materials and information to its members; supplies product information to users and specifiers of paving materials; and conducts training courses. The association, which counts more than 1,100 companies as members, was founded in 1955.
