

OUTDOOR RECREATION PROJECTS

PROVIDING SUPERIOR ASPHALT PAVEMENT SOLUTIONS FOR OUTDOOR RECREATION PROJECTS

Whether your organization is looking at patching potholes in a parking lot or reconstructing a tennis court, Bituminous Roadways, Inc. is your contractor of choice for everything asphalt. Our company has helped parks and recreation departments, municipalities, and property owners across the Twin Cities maintain their outdoor athletic surfaces, trails/pathways, parking lots and playgrounds.

TRAILS/PATHWAYS

The condition of the trails and pathways around buildings or in parks can determine how comfortable and safe the user experience will be. If there are pot holes and cracks, bikers, walkers, joggers and inline skaters will have a less than positive experience. It could potentially be dangerous and cause a liability. Be sure the trails in your common areas or parks are inspected yearly for damage and assessed for maintenance needs.

OUTDOOR ATHLETIC SURFACES

Transforming tennis courts to incorporate pickleball courts has been trending for a number of years. If your organization or property is constructing or performing maintenance on a tennis court, it's the perfect opportunity to meet the needs of a growing sport. In addition to constructing and maintaining tennis and pickleball courts, BR has experience with basketball courts, playgrounds and skate parks as well.

PARKING LOTS

First impressions are made in the parking lot. Whether that person has parked there once or a hundred times, it's the first experience they have when visiting your building or park system. What kind of impression is your parking lot making? Does it have pot holes? Is it full of cracks? Are there drainage issues? BR can help you in determining the best course of action to create a safe, smooth and visually appealing parking lot.
